Indicadores estratégicos de eficacia y productividad

Productividad chequeo PREVENIMSS por personal de enfermería VR >=16

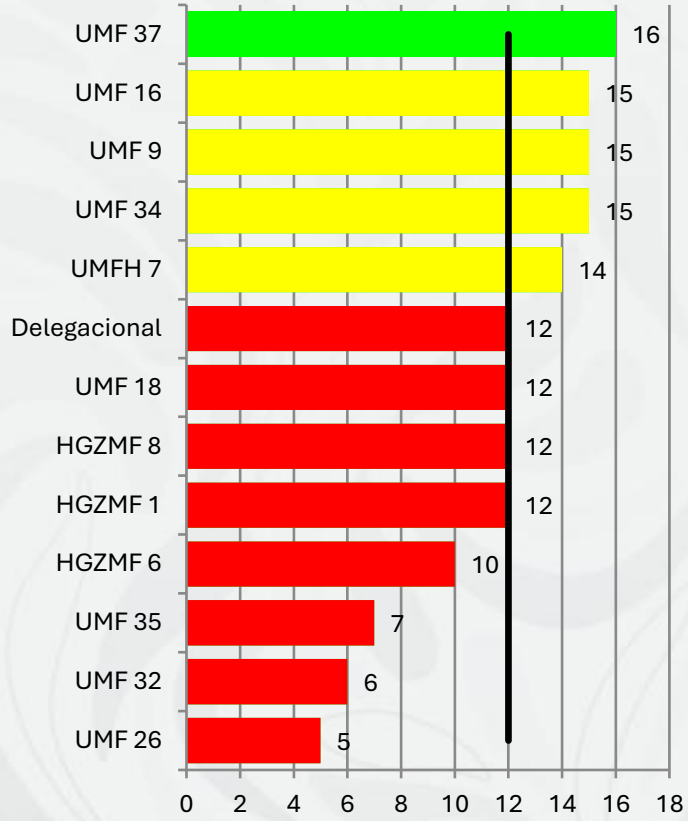

Productividad de atención integral por enfermería general clínica** VR >=16

**Indicador elaborado respecto de las atenciones preventivas proporcionadas por personal de enfermería clínica, aplicando los criterios metodológicos del MMIM utilizados para el chequeo PrevenIMSS por personal de enfermería.

Productividad de atención integral por enfermería especialista VR >=16

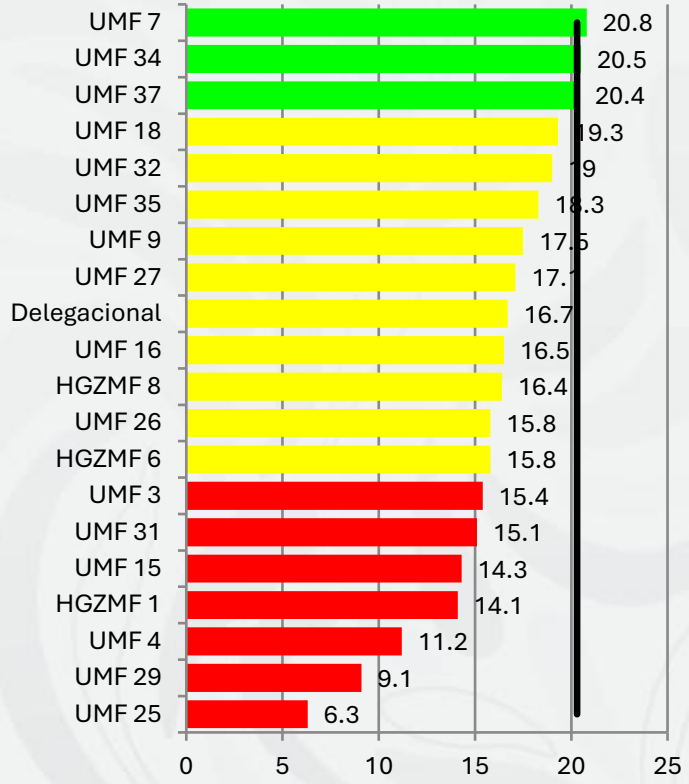

2026 año de Margarita Maza

OOAD Hidalgo
Jefatura de servicios de Prestaciones Medicas
Coordinación de Información y Análisis Estratégico

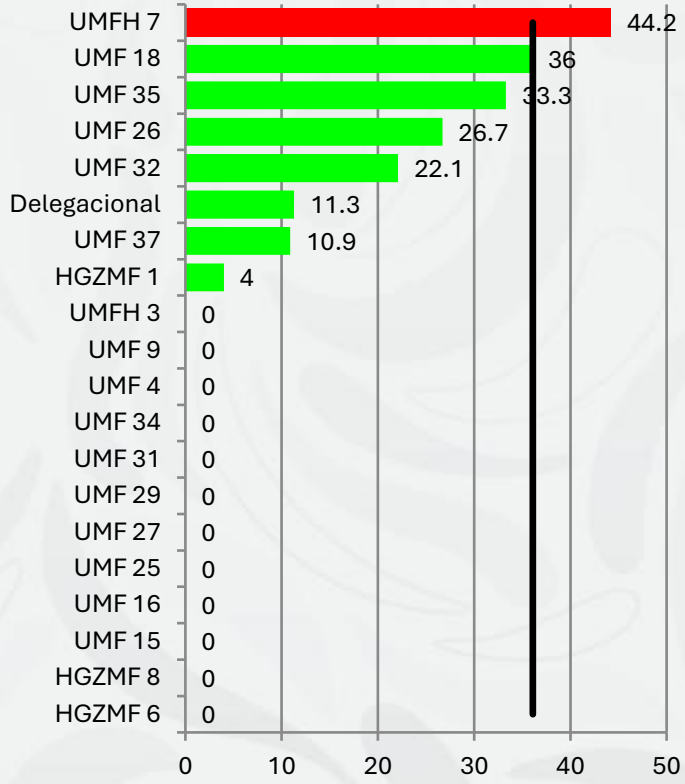

Gobierno de México | IMSS

Indicadores estratégicos de eficacia y productividad

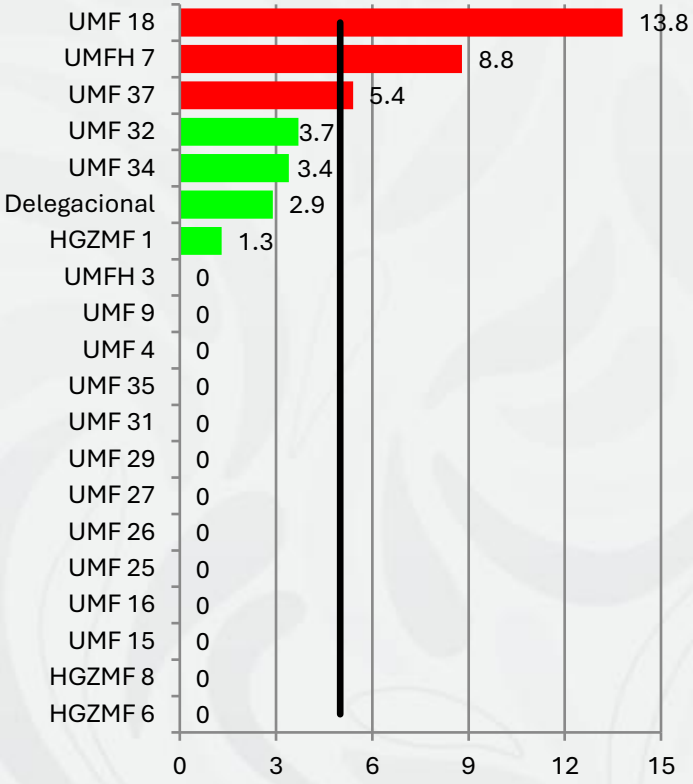

*Cobertura de detección de CaCu
VR >= 20.3

Tasa de incidencia displasia leve y moderada ♀
25 años y más
VR <=36.1 casos x 100,000

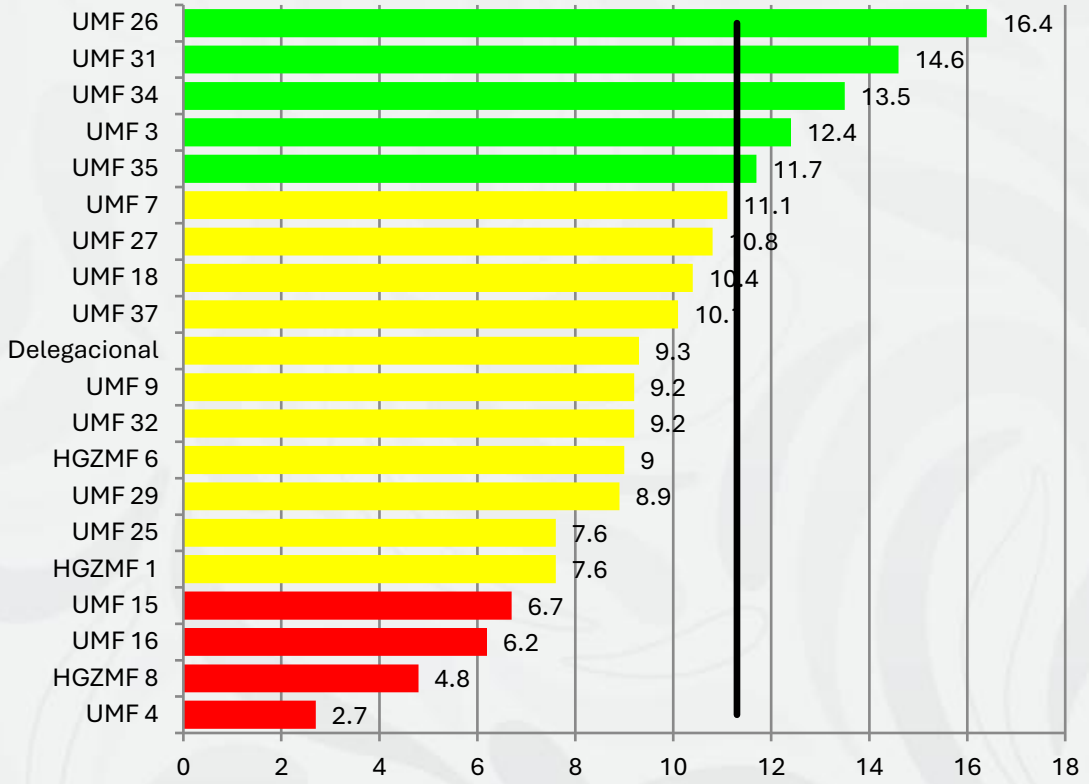

Tasa de incidencia displasia severa y cáncer in situ ♀
25 años y más
VR <=5.0 casos x 100,000

2026 año de Margarita Maza

*Cobertura de detección de CaMa por mastografía ♀ 40 a 69 años
VR >= 11.3

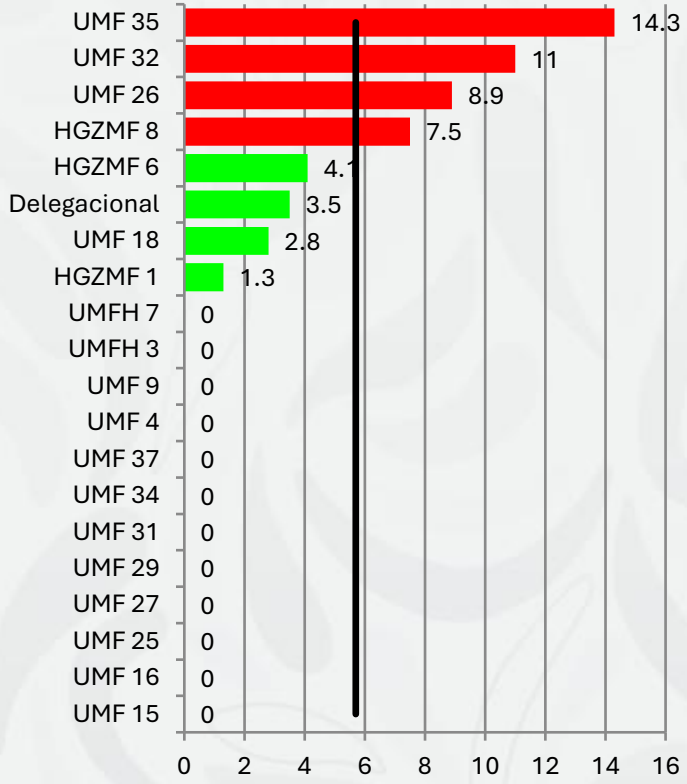

OOAD Hidalgo
Jefatura de servicios de Prestaciones Medicas
Coordinación de Información y Análisis Estratégico

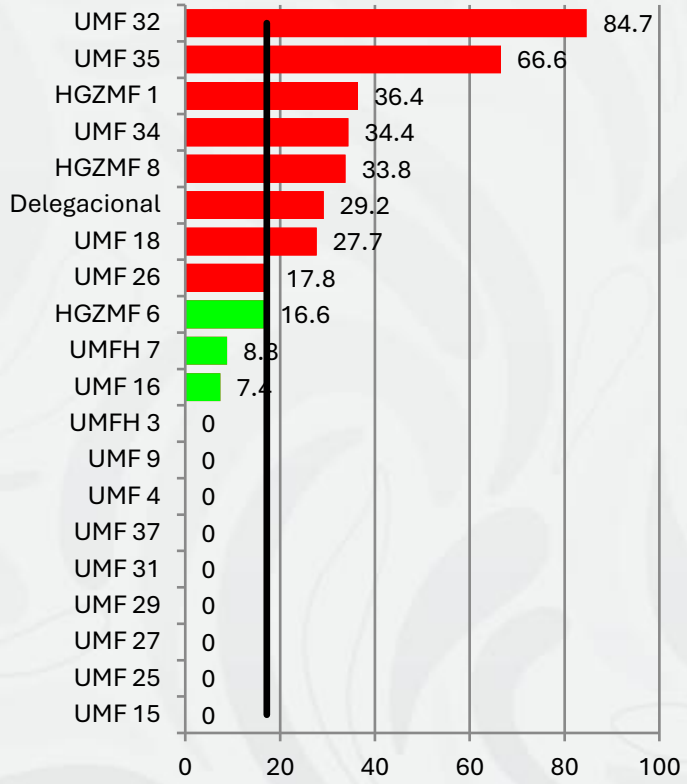

Gobierno de México | IMSS

Indicadores estratégicos de eficacia y productividad

Tasa de incidencia por cáncer cervicouterino ♀ 25 años y más
VR <=5.7 casos x 100,000

Tasa de incidencia por cáncer de mama ♀ 25 años y más
VR <=17.2 casos x 100,000

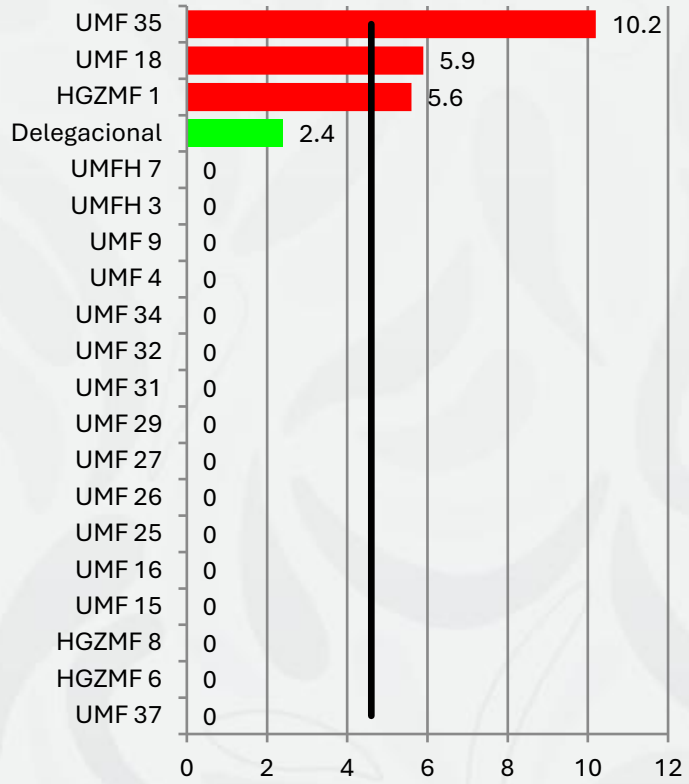

2026 año de Margarita Maza
